

PROJECT NAME:

SILENT SIGNAL

TEAM MEMBERS: Ionescu Stefan, Nere Costin

IDEA IN SHORT:

SilentSignal is a mobile application designed to help vulnerable people send emergency alerts quickly and safely, without the need to speak or type.

By selecting a symbol and automatically sharing their location, users can instantly notify nearby verified volunteers who can respond in real time.

The app is built for situations where traditional communication fails — such as panic, language barriers, disabilities, or unsafe environments — providing a fast, simple, and accessible way to ask for help.

Hardcore Entrepreneur hackathon 6.0

1. PRODUCT - PROBLEM WE SOLVE

Many people are unable to ask for help effectively in emergency situations due to:
panic or fear that blocks communication;
language barriers (tourists, refugees);
disabilities (hearing or speech impairments);
unsafe environments where speaking is dangerous (violence, being followed);
slow or inefficient access to emergency services.

Traditional solutions like calling emergency numbers are not always fast, accessible, or safe in these situations.

Solution
SilentSignal allows users to:
send an alert in just 2 taps using intuitive symbols;
automatically share their real-time location;
connect with nearby verified volunteers;
track the status of their alert in real time:
→ sent → assigned → resolved;
cancel the alert if the situation changes.

The system is designed to work without speaking, typing, or knowing a language, making it accessible to anyone in need.

2. OUR TARGET GROUP & SDGs

vulnerable individuals (elderly people, children, people alone);

refugees and non-native speakers;

people with disabilities;

NGOs and local emergency support organizations.

SDGs

SDG 3 – Good Health & Well-being

SDG 10 – Reduced Inequalities

SDG 11 – Sustainable Cities & Communities

3. SMART OBJECTIVES

reach 500+ users in the pilot phase;
recruit 100+ verified volunteers;
maintain an average response time of under 5 minutes.

Achievable:

partner with at least 3 NGOs to validate and support the system.

Relevant:

improve access to emergency assistance and increase safety for vulnerable populations.

Time-bound:

launch the MVP by May 2026.

4. PRICE

SilentSignal is completely free for vulnerable users, ensuring accessibility.

Revenue Sources

NGO subscriptions: €500 – €1500/month for access to dashboard and volunteer management tools;

partnerships with public institutions (municipalities, emergency services);

EU funding and social impact grants;

CSR partnerships with companies supporting safety and inclusion initiatives.

This model ensures financial sustainability without charging users in need.

5. PROMOTION

TikTok, Instagram, and YouTube Shorts showcasing real-life emergency scenarios;
emotional storytelling demonstrating how the app saves time in critical situations;
collaborations with influencers in tech, safety, and social impact fields;
awareness campaigns focused on inclusion and accessibility.

How and where we market
partnerships with NGOs and local institutions for real-world adoption;
recruitment campaigns in schools and universities to attract volunteers;
participation in tech events, hackathons, and community initiatives;
online content (videos, blogs, testimonials) to educate users about the app.
